# 3-WAY DIRECTIONAL CONTROL VALVE SPOOL TYPE, PILOT OPERATED, SPOOL "H".

### **DESCRIPTION**

This unit is a DIRECT ACTING, SCREW IN CARTRIDGE STYLE, SPOOL TYPE, HYDRAULIC 3-WAY DIRECTIONAL CONTROL ELEMENT, requiring remote pilot actuation.

#### **OPERATIONS**

This value allows flow from port 3 to port 4 with a spring biased spool. Port 2 is blocked. The spool will shift when piloted at port 1 with sufficient pressure to overcome the spring bias and allow flow from port 3 to port 2. "V" spring chamber is vented to atmosphere. This value shifts in a closed center position.

## FEATURES AND BENEFITS

Leakproof screw adjustment. This valve has a fixed or an adjustable bias spring. Adjustment screw can not be backed out of the valve. Overset protection – spring can not go solid. Hardened precision fitted spool & cage provides reliable, long life. A unibody cage construction provides very low hysteresis and reliable operation. All external carbon steel parts are plated for longer life against the elements. Valve is available with fixed, screw, tamperproof, capped and handknob adjustments. All cartridge valves are 100% functionally tested. Industry common cavity. SPECIFICATIONS
